Packaging Programs

By utilizing our custom warehousing and inventory management programs, we can help you free up space, money and labor.

- **Vendor Managed Inventory (VMI)** - Victory Packaging will optimize your inventory by looking at usage, floor stock and lead-time to determine whether you need a dynamic historical model, min-max model, input forecasted model or combination of all three. We also inventory your packaging requirements and warehouse it for you.
- **Just In Time (JIT)** – This program is designed for customers who require multiple transactions on a frequent basis and maximizes the use of available floor space.
- **Contract Packaging and Fulfillment** – This program allows you to focus on your core competency by placing the entire packaging function in the hands of packaging experts.

The goal of our packaging program is to let you focus on your core competencies while we gain a deeper understanding of the total cost management associated with your packaging and look for ways to optimize these costs.

Because every company is unique, we don't always know where our expertise will deliver value, but we are confident that it will. We partner with you to get a complete understanding of your current operation through a comprehensive assessment. This enables us to understand your challenges as well as identify opportunities where we can improve your business performance through increased productivity, efficient package design and optimized supply chain. We apply customized end-to-end packaging solutions, allowing you to focus on your core competencies.

No other company has the comprehensive experience and expertise to deliver cost management opportunities in so many ways and also transition and manage the process to capitalize on those opportunities.
